VOLUME 34, PART I

SUBJECT INDEX

A

Abrasion.
Tentative Methods of Test for Abrasion Resistance of Rubber Compounds, 1150.
Absorption.
Tentative Methods of Test for:
Laminated Tubes Used in Electrical Insulation, 1064.
Sampling and Testing Structural Clay Tile, 776.
Sheet and Plate Materials Used in Electrical Insulation, 1055.
Untreated Paper Used in Electrical Insulation, 1007.
Tentative Specifications for Non-Reinforced Concrete Sewer Pipe, 809.
Accelerated Tests.
Preservative Coatings for Structural Materials. Report of Committee D-1, 400.
Acetates.
Tentative Specifications for Amyl Acetate (From Fusel Oil) (85 to 88 per cent Grade), 878.
Acidity.
See **Neutralization.**
Adhesion Test.
Tentative Specifications and Tests for Friction Tape for General Use for Electrical Purposes, 1139.
Tentative Specifications and Tests for Rubber Insulating Tape, 1145.
Admixtures.
A Study of the Permeability of a Few Integrally Waterproofed Concretes, by W. M. Dunagan and G. C. Ernst. Report of Committee C-9, Appendix II, 383.
Aggregates.
Comparison of Standards for Colorimetric Test for Sand, Abstract of unpublished paper by C. L. Ford. Report of Committee C-9, Appendix I, 381.
Concrete and Concrete Aggregates. Report of Committee C-9, 378.
Agglutinating Value Test.
Proposed Method of Test for Agglutinating Value of Coal. Report of Committee D-5, Appendix, 457.
Aging Test.
Tentative Methods of Testing Untreated Paper Used in Electrical Insulation, 1007.
Tentative Specifications for Insulated Wire and Cable: Class AO, 30 per cent Hevea Rubber Compound, 1101.
Tentative Specifications for Insulated Wire and Cable: Performance Rubber Compound, 1128.
Alkalinity.
See **Neutralization.**

Alloys, Non-Ferrous.

See also **Brass; Bronze; Copper; Electrical Resistance and Heating Alloys; Light Metals.**

Copper and Copper Alloys, Cast and Wrought. Report of Committee B-5, 249.
Corrosion in Liquids. Report of Subcommittee VII, Committee B-3, 222.
Corrosion of Non-Ferrous Metals and Alloys. Report of Committee B-3, 221.
Die-Cast Metals and Alloys. Report of Committee B-6, 251.
The Effect of Variations in Aluminum Content on the Strength and Permanence of the A.S.T.M. No. XXIII Zinc Die-Casting Alloy, by E. A. Anderson and G. L. Werley. Report of Committee B-6, Appendix, 261. Discussion, 270.
Electrical-Heating, Electrical-Resistance and Electric-Furnace Alloys. Report of Committee B-4, 24[illegible].
Exposure and Corrosion Tests. Report of Subcommittee V, Committee B-6, 255.
Galvanic and Electrolytic Corrosion. Report of Subcommittee VIII, Committee B-3, 236.
Light Metals and Alloys, Cast and Wrought. Report of Committee B-7, 272.
Non-Ferrous Metals and Alloys. Report of Committee B-2, 217.
Service Characteristics of the Light Metals and Their Alloys. Report of Committee B-7, Appendix, 277.
Symposium on the Outdoor Weathering of Metals and Metallic Coatings—Washington Regional Meeting. Report of Committee E-6 on Papers and Publications, 574.

Alloy Steel.

See also **Steel.**

Effect of Temperature on the Properties of Metals. Report of Joint Research Committee, 207.
Iron-Chromium, Iron-Chromium-Nickel and Related Alloys. Report of Committee A-10, 190.
The Polishing and Etching of Iron-Chromium and Iron-Chromium-Nickel Alloys, by J. R. Vilella. Report of Committee A-10, Appendix, 193.
Tentative Methods of Test for:
Impact Testing of Metallic Materials, 1201.
Long-Time (Creep) High-Temperature Tension Tests of Metallic Materials, 1223.
Short-Time High-Temperature Tension Tests of Metallic Materials, 1214.
Tentative Revision of Standard Specifications for Alloy-Steel Bolting Materials for High-Temperature Service, 1257.
Tentative Specifications for Alloy-Steel Castings for Valves, Flanges and Fittings for Service at Temperatures from 750 to 1100 F., 609.
Tentative Specifications for Seamless Alloy-Steel Pipe for Service at Temperatures from 750 to 1100 F., 617.

Aluminum.

Die-Cast Metals and Alloys. Report of Committee B-6, 251.
The Effect of Variations in Aluminum Content on the Strength and Permanence of the A.S.T.M. No. XXIII Zinc Die-Casting Alloy, by E. A. Anderson and G. L. Werley. Report of Committee B-6, Appendix, 261. Discussion, 270.
Galvanic and Electrolytic Corrosion. Report of Subcommittee VIII, Committee B-3, 236.
Light Metals and Alloys, Cast and Wrought. Report of Committee B-7, 272.

Service Characteristics of the Light Metals and Their Alloys. Report of Committee B-7, Appendix, 277.
Tentative Methods of Test for:
Impact Testing of Metallic Materials, 1201.
Long-Time (Creep) High-Temperature Tension Tests of Metallic Materials, 1223.
Short-Time High-Temperature Tension Tests of Metallic Materials, 1214.
Tentative Specifications for Aluminum-Manganese Alloy Sheet and Plate, 673.
Tentative Specifications for Aluminum Sheet and Plate, 668.
Weight loss of metal disks in galvanic couple corrosion test after one year exposure, 242.

Amyl Acetate.
Tentative Specifications for Amyl Acetate (From Fusel Oil) (85 to 88 per cent Grade), 878.

Analyses.
See **Chemical Analyses.**
(Methods of analyses, testing, etc., are also indexed under the materials and subjects covered by them.)

Analysis Test Data.
See **Data, Analysis and Presentation of.**

Annual Meeting.
Annual Address by the President, Thomas R. Lawson, 27.
Annual Report of the Executive Committee, 35.
Eighth Award of Charles B. Dudley Medal. Summary of the Proceedings of the Thirty-seventh Annual Meeting, 12.
Papers and Publications. Report of Committee E-6, 573.
Summary of the Proceedings of the Thirty-seventh Annual Meeting, 1.

Anthracite.
See **Coal.**

Apparatus.
See **Testing Apparatus.**

Arbitration Test Bar.
Test Bars. Report of Special Subcommittee, Committee A-3, 148.

Asbestos.
Tentative Specifications for Asbestos Roving, 1169.
Tentative Specifications for Asbestos Yarns, 1172.

Ash.
Tentative Methods of Testing Untreated Paper Used in Electrical Insulation, 1007.

Asphalt.
Determination of flash point of viscous materials and suspensions of solids by means of the Pensky-Martens closed tester, 420.
Distillation. Report of Subcommittee B-3, Committee D-4, 448.
Road and Paving Materials. Report of Committee D-4, 444.
Standard Coefficient of Expansion for Bituminous Products. Report of Subcommittee X, Committee D-8, 486.
Tentative Method of Test for Separation of Liquid Asphaltic Products, 938.
Tentative Methods of Testing Emulsified Asphalts, 926.
Tentative Specifications for:
Asphalt Roofing Surfaced with Coarse Mineral Granules, 955.
Asphalt Roofing Surfaced with Fine Mineral Granules, 951.

Asphalt (*Continued*):
Tentative Specifications for:
Asphalt Roofing Surfaced with Powdered Talc or Mica, 947.
Asphalt Shingles Surfaced with Coarse Mineral Granules, 944.
Emulsified Asphalt (For Coarse Aggregate Plant Mixes), 916.
Emulsified Asphalt (For Retread and Coarse Aggregate Mixes), 918.
Emulsified Asphalt (Heavy Premix—Summer Grade), 920.
Emulsified Asphalt (Heavy Premix—Winter Grade), 922.
Emulsified Asphalt (Quick-Setting) for Penetration and Surface Treatment), 924.

Atmospheric Corrosion.
See **Corrosion; Weathering Tests.**

B

Barbed Wire.
Wire Test Program. Report of Subcommittee VIII, Committee A-5, Appendix, 172.

Barium Pigments.
Tentative Method of Test for Tinting Strength of White Pigments or White Pigment Pastes, 866.
Tentative Specifications for High Zinc Sulfide Lithopone, 862.
Tentative Specifications for Titanium Barium Pigment, 856.

Bars.
Discussion on Steel Reinforcement Bars for Concrete, 84.
Quality Standards for Wrought Iron. Report of Special Subcommittee of Subcommittee X on Research, Committee A-2, 129.
Tentative Specifications for Copper-Silicon Alloy Rods, Bars and Shapes, 695.

Bend Test.
Effect of Added Phosphorus on Low-Carbon Steel. Report of Joint Committee on Investigation of the Effect of Phosphorus and Sulfur in Steel, 113. Discussion, 122.
Effect of Sulfur on Forging Steel. Report of Joint Committee on Investigation of the Effect of Phosphorus and Sulfur in Steel, 87.

Bituminous Coal.
See **Coal.**

Bituminous Materials.
See **Asphalt; Emulsified Asphalts; Liquid Asphaltic Road Materials; Petroleum Products; Timber Preservatives; Waterproofing.**

Blankets.
Proposed Specifications for Rubber Insulating Blankets for Use Around Electrical Apparatus or Circuits Not Exceeding 3000 Volts to Ground. Report of Committee D-11, Appendix I, 522.

Block.
Tentative Revisions of Standard Specifications for:
Block for Durax Granite Pavements, 1274.
Block for Granite Block Pavements, 1274.
Block for Recut Granite Block Pavements, 1274.
Tentative Specifications and Tests for Load-Bearing Concrete Masonry Units, 772.

Boilers.
Tentative Specifications for Copper-Silicon Alloy Plates and Sheets, 692.
Tentative Specifications for Lap-Welded and Seamless Steel Pipe for High-Temperature Service, 637.

Bolting.
Tentative Revision of Standard Specifications for Alloy-Steel Bolting Material for High-Temperature Service, 1257.

Bomb Test.
Tentative Specifications for Insulated Wire and Cable: Class AO, 30 per cent Hevea Rubber Compound, 1101.
Tentative Specifications for Insulated Wire and Cable: Performance Rubber Compound, 1128.

Braid.
Tentative Specifications for Insulated Wire and Cable: Class AO, 30 per cent Hevea Rubber Compound, 1101.

Brass.
Corrosion in Liquids. Report of Subcommittee VII, Committee B-3, 222.
Tentative Method of Test for Long-Time (Creep) High-Temperature Tension Tests of Metallic Materials, 1223.
Tentative Method of Test for Short-Time High-Temperature Tension Tests of Metallic Materials, 1214.
Tentative Revision of Standard Methods of Chemical Analysis of Brass Ingots and Sand Castings, 1261.
Tentative Revision of Standard Specifications for Composition Brass or Ounce Metal Sand Castings, 1259.

Brick.
See also **Refractories.**
Brick. Report of Committee C-3, 364.
Refractories. Report of Committee C-8, 369.
Tentative Method of Test for:
Chemical Analysis of Magnesite Refractories, 784.
High-Temperature Heat Insulation (Compression, Flexure, Shrinkage), 791.
Panel Test for Resistance of Refractory Brick to Thermal and Structural Spalling, 796.
Panel Test for Resistance to Thermal and Structural Spalling of Fire-Clay Brick for Stationary Boilers and Malleable Iron Furnace Bungs, 804.
Tentative Specifications for Refractories for the Construction of Incinerators, 782.

Bronze.
Copper and Copper Alloys, Cast and Wrought. Report of Committee B-5, 249.
Corrosion in Liquids. Report of Subcommittee VII, Committee B-3, 222.
Tentative Method of Test for Long-Time (Creep) High-Temperature Tension Tests of Metallic Materials, 1223.
Tentative Method of Test for Short-Time High-Temperature Tension Tests of Metallic Materials, 1214.
Tentative Revision of Standard Methods of Chemical Analysis of Manganese Bronze, 1261.
Tentative Revision of Standard Specifications for Steam or Valve Bronze Sand Castings, 1259.

Building Tile.
See **Tile.**

Bulk Factor.
Tentative Methods of Testing Molding Powders Used in Manufacturing Molded Electrical Insulators, 1001.

C

Cable.
Tentative Methods of Testing Solid Filling and Treating Compounds Used for Electrical Insulation, 965.
Tentative Specifications for:
Friction Tape for General Use for Electrical Purposes, 1139.
Insulated Wire and Cable: Class A, 30 per cent Hevea Rubber Compound, 1126.
Insulated Wire and Cable: Class AO, 30 per cent Hevea Rubber Compound, 1101.
Insulated Wire and Cable: Performance Rubber Compound, 1128.
Rubber Insulating Tape, 1145.

Calcium Pigments.
Tentative Method of Test for Tinting Strength of White Pigments or White Pigment Pastes, 866.
Tentative Specifications for Titanium Calcium Pigment, 858.

Calibration, Methods of.
Tentative Methods of Impact Testing of Metallic Materials, 1201.
Tentative Methods of Verification of Testing Machines, 1233.

Castings.
See **Alloy Steel; Aluminum; Cast Iron; Copper; Die Castings; Light Metals; Steel.**

Cast Iron.
Cast Iron. Report of Committee A-3, 145.
Corrosion in Liquids. Report of Subcommittee VII, Committee B-3, 222.
Test Bars. Report of Special Subcommittee, Committee A-3, 148.
Tentative Methods of Impact Testing of Metallic Materials, 1201.
Tentative Specifications for Cast-Iron Culvert Pipe, 654.

Cellulose Coatings.
Cellulose Ester Coatings. Report of Subcommittee XXV, Committee D-1, 416.
Tentative Methods of Testing Nitrocellulose Clear Lacquers and Lacquer Enamels, 879.

Cement.
Cement Reference Laboratory. Report of Subcommittee, Committee C-1, 361.
Cement. Report of Committee C-1, 307.
Plastic Mortar Tests for Portland Cement. Report of Working Committee, Committee C-1, 322.
Volume Change and Soundness of Portland Cement. Report of Working Committee, Committee C-1, 356.
Report on Cooperative Sub-Sieve Fineness Tests by the Working Committee on Fineness. Report of Committee C-1, 315.
Tentative Method of Test for Compressive Strength of Portland-Cement Mortars, 743.

Centrifuge.
Tentative Revision of Standard Method of Test for Precipitation Number of Lubricating Oils, 1273.
Tentative Revision of Standard Method of Test for Water and Sediment in Petroleum Products by Means of Centrifuge, 1273.
C. F. R. Engine.
Tentative Method of Test for Knock Characteristics of Motor Fuels, 902.
Charpy Impact Test.
Tentative Methods of Impact Testing of Metallic Materials, 1201.
Tentative Methods of Testing Electrical Insulating Materials for Resistance to Impact, 995.
Chemical Analyses.
Methods of Analysis of Paint Materials. Report of Subcommittee VIII, Committee D-1, 407.
Tentative Method of Chemical Analysis of Magnesite Refractories, 784.
Tentative Methods of Chemical Analysis of Metallic Materials for Electrical Heating, 710.
Tentative Revisions of Standard Methods of:
Chemical Analysis of Brass Ingots and Sand Castings, 1261.
Chemical Analysis of Manganese Bronze, 1261.
Routine Analysis of Dry Red Lead, 1265.
Routine Analysis of White Linseed Oil Paints, 1266.
Routine Analysis of Yellow and Orange Pigments Containing Chromium Compounds, Blue Pigments and Chrome Green, 1269.
Chromium-Nickel Alloys.
Effect of Temperature on the Properties of Metals. Report of Joint Research Committee, 207.
Iron-Chromium, Iron-Chromium-Nickel and Related Alloys. Report of Committee A-10, 190.
The Polishing and Etching of Iron-Chromium and Iron-Chromium-Nickel Alloys, by J. R. Vilella. Report of Committee A-10, Appendix, 193.
Clay.
Tentative Definitions of Terms Relating to Refractories, 806.
Tentative Specifications for Ground Fire Clay, 780.
Clay Hollow Tile.
See **Tile.**
Cloth.
See **Insulating Materials; Textile Materials.**
Coal.
Classification of Coals. Report of Sectional Committee, 463.
Coal Classification. Report of the Technical Committee, Sectional Committee on Classification of Coals, 478.
Coal and Coke. Report of Committee D-5, 451.
Nomenclature. Report of the Technical Committee, Sectional Committee on Classification of Coals, 475.
Proposed Method of Test for Agglutinating Value of Coal. Report of Committee D-5, Appendix, 457.
Scientific Classification. Report of the Technical Committee, Sectional Committee on Classification of Coals, 469.
Tentative Specifications for Classification of Coals by Grade, 841.
Tentative Specifications for Classification of Coals by Rank, 834.

Coating Test.
Tentative Methods of Testing Emulsified Asphalts, 926.
Coke.
Coal and Coke. Report of Committee D-5, 451.
Color.
Tentative Methods of Test for:
Color of Lubricating Oils by Means of A.S.T.M. Union Colorimeter, 885.
Color of Petrolatum by Means of A.S.T.M. Union Colorimeter, 890.
Color of Refined Petroleum Oil by Means of Saybolt Chromometer, 895.
Mass Color and Tinting Strength of Dry Color Pigments or Pastes, 871.
Colorimetric Test.
Comparison of Standards for Colorimetric Test for Sand, Abstract of unpublished paper by C. L. Ford. Report of Committee C-9, Appendix I, 381.
Compression Testing.
Proposed Method of Test for Agglutinating Value of Coal. Report of Committee D-5, Appendix, 457.
Plastic Mortar Tests for Portland Cement. Report of Working Committee, Committee C-1, 322.
Tentative Method of Test for:
Compression Set of Vulcanized Rubber, 1164.
Compressive Strength of Portland-Cement Mortars, 743.
High-Temperature Heat Insulation (Compression, Flexure, Shrinkage), 791.
Laminated Round Rods Used in Electrical Insulation, 1051.
Laminated Tubes Used in Electrical Insulation, 1064.
Sampling and Testing Structural Clay Tile, 776.
Sheet and Plate Materials Used in Electrical Insulation, 1055.
Tentative Specifications for:
Cast-Iron Culvert Pipe, 654.
Non-Reinforced Concrete Sewer Pipe, 809.
Reinforced-Concrete Sewer Pipe, 822.
Concrete.
Brick. Report of Committee C-3, 364.
Comparison of Standards for Colorimetric Test for Sand, Abstract of unpublished paper by C. L. Ford. Report of Committee C-9, Appendix I, 381.
Concrete and Concrete Aggregates. Report of Committee C-9, 378.
Concrete Pipe. Report of Committee C-13, 397.
Plastic Mortar Tests for Portland Cement. Report of Working Committee, Committee C-1, 322.
A Study of the Permeability of a Few Integrally Waterproofed Concretes, by W. M. Dunagan and G. C. Ernst. Report of Committee C-9, Appendix II, 383.
Tentative Specifications for:
Load-Bearing Concrete Masonry Units, 772.
Non-Reinforced Concrete Sewer Pipe, 809.
Reinforced-Concrete Sewer Pipe, 822.
Sodium Silicate for Curing Concrete, 833.
Concrete Reinforcement.
Discussion on Steel Reinforcement Bars for Concrete, 84.
Tentative Revision of Standard Specifications for Billet-Steel Concrete Reinforcement Bars, 1255.

Tentative Revision of Standard Specifications for Rail-Steel Concrete Reinforcement Bars, 1255.

Condenser Paper.

Tentative Methods of Testing Untreated Paper Used in Electrical Insulation, 1007.

Consistency.

Tentative Definitions of Terms Consistency and Plasticity, 1245.
Tentative Methods of Physical Test for Limestone, Quicklime and Hydrated Lime, 754.
Tentative Methods of Testing Nitrocellulose Clear Lacquers and Lacquer Enamels, 879.

Copper.

Copper and Copper Alloys, Cast and Wrought. Report of Committee B-5, 249.
Corrosion in Liquids. Report of Subcommittee VII, Committee B-3, 222.
Galvanic and Electrolytic Corrosion. Report of Subcommittee VIII, Committee B-3, 236.
Symposium on the Outdoor Weathering of Metals and Metallic Coatings—Washington Regional Meeting. Report of Committee E-6 on Papers and Publications, 574.
Tentative Method of Test for Long-Time (Creep) High-Temperature Tension Tests of Metallic Materials, 1223.
Tentative Method of Test for Short-Time High-Temperature Tension Tests of Metallic Materials, 1214.
Tentative Revision of Standard Specifications for Sand Castings of the Alloy: Copper 88 per cent; Tin 8 per cent; Zinc 4 per cent, 1250.
Tentative Specifications for:
- Copper-Silicon Alloy Plates and Sheets, 692.
- Copper-Silicon Alloy Rods, Bars and Shapes, 695.
- Insulated Wire and Cable: Class A, 30 per cent Hevea Rubber Compound 1126.
- Insulated Wire and Cable: Class AO, 30 per cent Hevea Rubber Compound, 1101.
- Insulated Wire and Cable: Performance Rubber Compound, 1128.
- Sheet Copper-Silicon Alloy, 699.

Weight loss of metal disks in galvanic couple corrosion test after one year exposure, 242.

Corrosion.

See also **Weathering Tests.**
Corrosion of Iron and Steel. Report of Committee A-5, 154.
Corrosion in Liquids. Report of Subcommittee VII, Committee B-3, 222.
Corrosion of Non-Ferrous Metals and Alloys. Report of Committee B-3, 221.
Embrittlement Investigation. Report of Subcommittee X, Committee A-5, 184.
Exposure and Corrosion Tests. Report of Subcommittee V, Committee B-6, 255.
Field Tests of Metallic Coatings. Report of Subcommittee VIII, Committee A-5, 159.
Galvanic and Electrolytic Corrosion. Report of Subcommittee VIII, Committee B-3, 236.
Service Characteristics of the Light Metals and Their Alloys. Report of Committee B-7, Appendix, 277.

Corrosion (*Continued*):
Specifications for Metallic-Coated Products. Report of Subcommittee VI, Committee A-5, 158.
Symposium on the Outdoor Weathering of Metals and Metallic Coatings—Washington Regional Meeting. Report of Committee E-6 on Papers and Publications, 574.
Total Immersion Tests. Report of Subcommittee V, Committee A-5, 157.
Weight loss of metal disks in galvanic couple corrosion test after one year exposure, 242.
Wire Test Program. Report of Subcommittee VIII, Committee A-5, Appendix, 172.
Cotton Fabrics.
Tentative Revision of Standard Specifications for Chafer Tire Fabrics, 1275.
Tentative Revision of Standard Specifications for Tolerances and Test Methods for Certain Light and Medium Cotton Fabrics, 1275.
Tentative Specifications for:
Friction Tape for General Use for Electrical Purposes, 1139.
Holland Cloth, 1175.
Insulated Wire and Cable: Class AO, 30 per cent Hevea Rubber Compound, 1101.
Textile Materials. Report of Committee D-13, 532.
Creep Tests.
See also **Temperature, Effect of.**
Tentative Method of Test for Long-Time (Creep) High-Temperature Tension Tests of Metallic Materials, 1223.
Creosote.
Tentative Specifications for Creosote, 843.
Tentative Specifications for Creosote Coal-Tar Solution, 845.
Crushing Strength.
See **Compression Testing.**
Crystallization.
Crystallization of Rosin. Report of Subcommittee II, Committee D-17, 546.
Culvert Pipe.
Tentative Specifications for Cast-Iron Culvert Pipe, 654.
Curing Concrete.
Tentative Specifications for Sodium Silicate for Curing Concrete, 833.

D

Damp-Proofing.
See **Waterproofing.**
Data, Analysis and Presentation of.
Methods of Testing. Report of Committee E-1, 553.
Definitions of Terms.
See **Nomenclature.**
Demulsibility Test.
Tentative Methods of Testing Emulsified Asphalts, 926.
Density.
Tentative Methods of Testing Molding Powders Used in Manufacturing Molded Electrical Insulators, 1001.

Die Castings.
Die-Cast Metals and Alloys. Report of Committee B-6, 251.
The Effect of Variations in Aluminum Content on the Strength and Permanence of the A.S.T.M. No. XXIII Zinc Die-Casting Alloy, by E. A. Anderson and G. L. Werley. Report of Committee B-6, Appendix, 261. Discussion, 270.
Exposure and Corrosion Tests. Report of Subcommittee V, Committee B-6, 255.
Tentative Methods of Impact Testing of Metallic Materials, 1201.
Tentative Specifications for Magnesium-Base Alloy Die Castings, 703.
Tentative Specifications for Zinc-Base Alloy Die Castings, 706.
Dielectric Strength.
Proposed Specifications for Rubber Insulating Blankets for Use Around Electrical Apparatus or Circuits Not Exceeding 3000 Volts to Ground. Report of Committee D-11, Appendix I, 522.
Tentative Methods of Test for:
Electrical Insulating Materials for Power Factor and Dielectric Constant, 1029.
Friction Tape for General Use for Electrical Purposes, 1139.
Sheet, Tape and Molded Insulating Materials for Dielectric Strength, 982.
Solid Filling and Treating Compounds Used for Electrical Insulation, 965.
Untreated Paper Used in Electrical Insulation, 1007.
Varnishes Used for Electrical Insulation, 1082.
Diesel Fuel Oil.
Diesel-Fuel-Oil Classification. Report of Committee D-2, Appendix, 440.
Distillation.
Distillation. Report of Subcommittee B-3, Committee D-4, 448.
Tentative Methods of Testing Emulsified Asphalts, 926.
Tentative Method of Test for Separation of Liquid Asphaltic Products, 938.
Dudley Medal.
Eighth Award of Charles B. Dudley Medal. Summary of the Proceedings of the Thirty-seventh Annual Meeting, 12.

E

Effect of Temperature.
See **Temperature, Effect of.**
Electrical Insulating Materials.
See **Insulating Materials.**
Electrical Resistance and Heating Alloys.
Electrical-Heating, Electrical-Resistance and Electric-Furnace Alloys. Report of Committee B-4, 244.
Tentative Methods of Test for:
Chemical Analysis of Metallic Materials for Electrical Heating, 710.
Linear Expansion of Metals, 733.
Short-Time High-Temperature Tension Tests of Metallic Materials, 1214.
Electric-Welded Pipe.
Tentative Specifications for Electric-Fusion-Welded Steel Pipe for High-Temperature and High-Pressure Service, 628.
Tentative Specifications for Electric-Fusion-Welded Steel Pipe (Sizes 8 in. to but not Including 30 in.), 598.

Electrodeposited Coatings.
Field Tests of Metallic Coatings. Report of Subcommittee VIII, Committee A-5, 159.
Electrolytic Corrosion.
Galvanic and Electrolytic Corrosion. Report of Subcommittee VIII, Committee B-3, 236.
Electroplating.
Service Characteristics of the Light Metals and Their Alloys. Report of Committee B-7, Appendix, 277.
Embrittlement.
Embrittlement Investigation. Report of Subcommittee X, Committee A-5, 184.
Emulsified Asphalts.
Bituminous Waterproofing and Roofing Materials. Report of Committee D-8, 483.
Road and Paving Materials. Report of Committee D-4, 444.
Tentative Methods of Testing Emulsified Asphalts, 926.
Tentative Specifications for:
Emulsified Asphalt (For Coarse Aggregate Plant Mixes), 916.
Emulsified Asphalt (For Retread and Coarse Aggregate Mixes), 918.
Emulsified Asphalt (Heavy Premix—Summer Grade), 920.
Emulsified Asphalt (Heavy Premix—Winter Grade), 922.
Emulsified Asphalt ((Quick-Setting) for Penetration and Surface Treatment), 924.
Enamels.
Cellulose Ester Coatings. Report of Subcommittee XXV, Committee D-1, 416.
Tentative Methods of Testing Nitrocellulose Clear Lacquers and Lacquer Enamels, 879.
Etching.
See **Metallography.**
Executive Committee.
Annual Report of the Executive Committee, 35.
Expansion.
Exposure and Corrosion Tests. Report of Subcommittee V, Committee B-6, 255.
Volume Change and Soundness of Portland Cement. Report of Working Committee, Committee C-1, 356.
Tentative Method of Test for Linear Expansion of Metals, 733.
Expansion, Coefficient of.
Standard Coefficient of Expansion for Bituminous Products. Report of Subcommittee X, Committee D-8, 486.
Tentative Methods of Testing Solid Filling and Treating Compounds Used for Electrical Insulation, 965.

F

Farm-Field Fencing.
Wire Test Program. Report of Subcommittee VIII, Committee A-5, Appendix, 172.
Fatigue.
Fatigue of Metals. Report of Research Committee, 205.

Felt.
Tentative Specifications for:
Asphalt Roofing Surfaced with Coarse Mineral Granules, 955.
Asphalt Roofing Surfaced with Fine Mineral Granules, 951.
Asphalt Roofing Surfaced with Powdered Talc or Mica, 947.
Asphalt Shingles Surfaced with Coarse Mineral Granules, 944.
Fencing.
Wire Test Program. Report of Subcommittee VIII, Committee A-5, Appendix, 172.
Ferro-Alloys.
Ferro-Alloys. Report of Committee A-9, 188.
Tentative Method for Sampling Molybdenum Salts and Compounds for Metallurgical Use, 660.
Fineness.
See **Mechanical Analysis; Particle Size.**
Fire Brick.
See **Refractories.**
Fireproofing.
Tentative Specifications for:
Structural Clay Load-Bearing Wall Tile, 768.
Structural Clay Floor Tile, 761.
Structural Clay Non-Load-Bearing Tile, 765.
Flange Material.
Tentative Specifications for Alloy-Steel Castings for Valves, Flanges and Fittings for Service at Temperatures from 750 to 1100 F., 609.
Flash Point.
Determination of flash point of viscous materials and suspensions of solids by means of the Pensky-Martens closed tester, 420.
Flexure Testing.
Methods of Testing. Report of Committee E-1, 553.
Tentative Methods of Test for:
High-Temperature Heat Insulation (Compression, Flexure, Shrinkage), 791.
Laminated Round Rods Used in Electrical Insulation, 1051.
Sheet and Plate Materials Used in Electrical Insulation, 1055.
Test Bars. Report of Special Subcommittee, Committee A-3, 148.
Floor Tile.
See **Tile.**
Flow Tests.
Plastic Mortar Tests for Portland Cement. Report of Working Committee, Committee C-1, 322.
Folding Endurance Test.
Tentative Methods of Testing Untreated Paper Used in Electrical Insulation, 1007.
Forgings.
Effect of Sulfur on Forging Steel. Report of Joint Committee on Investigation of the Effect of Phosphorus and Sulfur in Steel, 87.
Tentative Methods of Impact Testing of Metallic Materials, 1201.
Tentative Revisions of Standard Specifications for:
Carbon-Steel Car and Tender Axles, 1250.
Quenched-and-Tempered Alloy-Steel Axles, Shafts and Other Forgings for Locomotives and Cars, 1252.
Quenched-and-Tempered Carbon-Steel Axles, Shafts and Other Forgings for Locomotives and Cars, 1251.

Forgings (*Continued*):
Tentative Specifications for Magnesium-Base Alloy Forgings, 678.
Freezing-and-Thawing Tests.
Tentative Methods of Sampling and Testing Structural Clay Tile, 776.
Tentative Methods of Testing Emulsified Asphalts, 926.
Friction Tape.
Tentative Specifications and Tests for Friction Tape for General Use for Electrical Purposes, 1139.
Friction Test.
See **Adhesion Test.**
Fuel Oil.
Diesel-Fuel-Oil Classification. Report of Committee D-2, Appendix, 440.
Tentative Specifications for Fuel Oils, 882.
Furring Tile.
Tentative Specifications for Structural Clay Non-Load-Bearing Tile, 765.
Fusion Point.
Pyrometric Cone Equivalent *Versus* Fusion Point (A Question of Nomenclature), by F. A. Harvey. Report of Committee C-8, Appendix, 376.

G

Galvanic Couple Tests.
Galvanic and Electrolytic Corrosion. Report of Subcommittee VIII, Committee B-3, 236.
Symposium on the Outdoor Weathering of Metals and Metallic Coatings—Washington Regional Meeting. Report of Committee E-6 on Papers and Publications, 574.
Weight loss of metal disks in galvanic couple corrosion test after one year exposure, 242.
Galvanizing.
See also **Zinc.**
Field Tests of Metallic Coatings. Report of Subcommittee VIII, Committee A-5, 159.
Specifications for Metallic-Coated Products. Report of Subcommittee VI, Committee A-5, 158.
Symposium on the Outdoor Weathering of Metals and Metallic Coatings—Washington Regional Meeting. Report of Committee E-6 on Papers and Publications, 574.
Tentative Revision of Standard Specifications for Welded and Seamless Steel Pipe, 1255.
Tentative Specifications for Black and Hot-Dipped Zinc-Coated (Galvanized) Welded and Seamless Steel Pipe for Ordinary Uses, 604.
Wire Test Program. Report of Subcommittee VIII, Committee A-5, Appendix, 172.
Gasoline.
Gasoline. Report of Technical Committee A, Committee D-2, 435.
Petroleum Products and Lubricants. Report of Committee D-2, 418.
Tentative Methods of Test for:
Gum Content of Gasoline, 899.
Knock Characteristics of Motor Fuels, 902.
Sulfur in Petroleum Oils by Lamp Method, 911.

Tentative Revision of Standard Method of Test for Distillation of Gasoline, Naphtha, Kerosine and Similar Petroleum Products, 1273.

Grain Size.
See **Metallography.**

Gray Iron.
See **Cast Iron.**

Grease.
Tentative Method of Test for Color of Petrolatum by Means of A.S.T.M. Union Colorimeter, 890.

Grease Wool.
Tentative Method of Estimating Hard Scoured Wool in Wool in the Grease, 1184.

Gum Test.
Gasoline. Report of Technical Committee A, Committee D-2, 435.
Tentative Method of Test for Gum Content of Gasoline, 899.

Gypsum.
Gypsum. Report of Committee C-11, 395.

H

Hardness Testing.
Discussion on Use of the Tension Test for Judging the Suitability of Sheet Metals for Various Purposes. Report of Committee E-1, Appendix, 563.
Effect of Sulfur on Forging Steel. Report of Joint Committee on Investigation of the Effect of Phosphorus and Sulfur in Steel, 87.
Tentative Methods of Testing Sheet and Plate Materials Used in Electrical Insulation, 1055.

Heat-Resistant Alloys.
See **Electrical Resistance and Heating Alloys.**

Heat Transmission.
Tentative Symbols for Heat Transmission, 807.

Heat Treatment.
Tentative Specifications for Alloy-Steel Castings for Valves, Flanges and Fittings for Service at Temperatures from 750 to 1100 F., 609.

High Temperature.
Effect of Temperature on the Properties of Metals. Report of Joint Research Committee, 207.
Proposed Revisions in Tentative Methods for High-Temperature Tension Tests of Metallic Materials. Report of Joint Research Committee on Effect of Temperature on the Properties of Metals, Appendix, 213.
Tentative Methods of Test for:
High-Temperature Heat Insulation (Compression, Flexure, Shrinkage), 791.
Linear Expansion of Metals, 733.
Long-Time (Creep) High-Temperature Tension Tests of Metallic Materials, 1223.
Short-Time High-Temperature Tension Tests of Metallic Materials, 1214.
Tentative Revisions of Standard Specifications for:
Alloy-Steel Bolting Material for High-Temperature Service, 1257.
Carbon-Steel Castings for Valves, Flanges and Fittings for High-Temperature Service, 1256.
Forged or Rolled Steel Pipe Flanges for High-Temperature Service, 1257.

High Temperature (*Continued*):
Tentative Specifications for:
Alloy-Steel Castings for Valves, Flanges and Fittings for Service at Temperatures from 750 to 1100 F., 609.
Electric-Fusion-Welded Steel Pipe for High-Temperature and High-Pressure Service, 628.
Lap-Welded and Seamless Steel Pipe for High-Temperature Service, 637.
Seamless Alloy-Steel Pipe for Service at Temperatures from 750 to 1100 F., 617.

Holland Cloth.
Tentative Specifications for Holland Cloth, 1175.

Hollow Tile.
See **Tile.**

I

Illuminating Oils.
Tentative Method of Test for Sulfur in Petroleum Oils by Lamp Method, 911.

Immersion Tests.
See also **Corrosion.**
Corrosion in Liquids. Report of Subcommittee VII, Committee B-3, 222.
Total Immersion Tests. Report of Subcommittee V, Committee A-5, 157.

Impact Testing.
Effect of Added Phosphorus on Low-Carbon Steel. Report of Joint Committee on Investigation of the Effect of Phosphorus and Sulfur in Steel, 113. Discussion, 122.
Effect of Sulfur on Forging Steel. Report of Joint Committee on Investigation of the Effect of Phosphorus and Sulfur in Steel, 87.
The Effect of Variations in Aluminum Content on the Strength and Permanence of the A.S.T.M. No. XXIII Zinc Die-Casting Alloy, by E. A. Anderson and G. L. Werley. Report of Committee B-6, Appendix, 261. Discussion, 270.
Tentative Methods of Impact Testing of Metallic Materials, 1201.
Tentative Methods of Testing Electrical Insulating Materials for Resistance to Impact, 995.

Incinerator Brick.
Tentative Specifications for Refractories for the Construction of Incinerators, 782.

Insulating Materials.
Description and use of remodeled MacMichael viscosimeter for determining viscosity of insulating varnishes, 1092.
Electrical Insulating Materials. Report of Committee D-9, 488.
Modified Baader Saponification Test for Electrical Insulating Oils. Report of Committee D-9, Appendix, 511.
Proposed Specifications for Rubber Insulating Blankets for Use Around Electrical Apparatus or Circuits Not Exceeding 3000 Volts to Ground. Report of Committee D-11, Appendix I, 522.
Tentative Methods of Test for:
Electrical Insulating Materials for Power Factor and Dielectric Constant, 1029.
Electrical Insulating Materials for Resistance to Impact, 995.
High-Temperature Heat Insulation (Compression, Flexure, Shrinkage), 791.

Tentative Methods of Test for:
Laminated Round Rods Used in Electrical Insulation, 1051.
Laminated Tubes Used in Electrical Insulation, 1064.
Molding Powders Used in Manufacturing Molded Electrical Insulators, 1001.
Sheet and Plate Materials Used in Electrical Insulation, 1055.
Sheet, Tape and Molded Insulating Materials for Dielectric Strength, 982.
Solid Filling and Treating Compounds Used for Electrical Insulation, 965.
Thickness of Solid Electrical Insulation, 1069.
Untreated Paper Used in Electrical Insulation, 1007.
Varnished Cloths and Varnished Cloth Tapes Used in Electrical Insulation, 1074.
Varnishes Used for Electrical Insulation, 1082.
Tentative Revision of Standard Methods of Testing Molded Materials Used for Electrical Insulation, 1277.
Tentative Specifications for:
Asbestos Roving, 1169.
Black Bias-Cut Varnished Cloth Tape Used for Electrical Insulation, 959.
Friction Tape for General Use for Electrical Purposes, 1139.
Insulated Wire and Cable: Class A, 30 per cent Hevea Rubber Compound, 1126.
Insulated Wire and Cable: Class AO, 30 per cent Hevea Rubber Compound, 1101.
Insulated Wire and Cable: Performance Rubber Compound, 1128.
Rubber Insulating Tape, 1145.

Iron.
See **Alloy Steel; Cast Iron; Steel; Wrought Iron.**

Izod Impact Test.
Tentative Methods of Impact Testing of Metallic Materials, 1201.
Tentative Methods of Testing Electrical Insulating Materials for Resistance to Impact, 995.

K

Kerosine.
Tentative Method of Test for Color of Refined Petroleum Oil by Means of Saybolt Chromometer, 895.
Tentative Method of Test for Sulfur in Petroleum Oils by Lamp Method, 911.

Knock Characteristics.
Tentative Method of Test for Knock Characteristics of Motor Fuels, 902.

L

Laboratory Inspection.
Cement Reference Laboratory. Report of Subcommittee, Committee C-1, 361.

Lacquers.
Cellulose Ester Coatings. Report of Subcommittee XXV, Committee D-1, 416.
Electrical Insulating Materials. Report of Committee D-9, 488.
Tentative Methods of Testing Nitrocellulose Clear Lacquers and Lacquer Enamels, 879.

Lead.
Corrosion in Liquids. Report of Subcommittee VII, Committee B-3, 222.
Galvanic and Electrolytic Corrosion. Report of Subcommittee VIII, Committee B-3, 236.
Non-Ferrous Metals and Alloys. Report of Committee B-2, 217.
Tentative Specifications for Pig Lead, 662.
Weight loss of metal disks in galvanic couple corrosion test after one year exposure, 242.

Life Test.
See **Aging Test.**

Light Metals.
Light Metals and Alloys, Cast and Wrought. Report of Committee B-7, 272.
Service Characteristics of the Light Metals and Their Alloys. Report of Committee B-7, Appendix, 277.
Tentative Methods of Test for:
Impact Testing of Metallic Materials, 1201.
Long-Time (Creep) High-Temperature Tension Tests of Metallic Materials, 1223.
Short-Time High-Temperature Tension Tests of Metallic Materials, 1214.
Tentative Specifications for:
Aluminum-Manganese Alloy Sheet and Plate, 673.
Aluminum Sheet and Plate, 668.
Magnesium-Base Alloy Forgings, 678.
Magnesium-Base Alloy Sand Castings, 684.
Magnesium-Base Alloy Sheet, 688.
Magnesium-Base Alloy Die Castings, 703.
Magnesium-Base Alloy Ingot for Remelting, 682.

Lime.
Lime. Report of Committee C-7, 366.
Tentative Methods of Physical Test for Limestone, Quicklime and Hydrated Lime, 754.
Tentative Specifications for Hydrated Lime for Structural Purposes, 752.
Tentative Specifications for Quicklime for Structural Purposes, 749.

Liquid Asphaltic Road Materials.
See also **Emulsified Asphalts.**
Distillation. Report of Subcommittee B-3, Committee D-4, 448.
Standard Coefficient of Expansion for Bituminous Products. Report of Subcommittee X, Committee D-8, 486.
Tentative Methods of Test for Separation of Liquid Asphaltic Products, 938.

Lithopone.
Tentative Method of Test for Tinting Strength of White Pigments or White Pigment Pastes, 866.
Tentative Specifications for High Zinc Sulfide Lithopone, 862.

Long-Time High-Temperature Tests.
Tentative Method of Test for Long-Time (Creep) High-Temperature Tension Tests of Metallic Materials, 1223.

Low Heat Cement.
Cement. Report of Committee C-1, 307.

Lubricants.
See **Grease; Oils; Petroleum Products.**

M

MacMichael Viscosimeter.
Description and use of remodeled MacMichael viscosimeter for determining viscosity of insulating varnishes, 1092.
Magnesium.
Light Metals and Alloys, Cast and Wrought. Report of Committee B-7, 272.
Service Characteristics of the Light Metals and Their Alloys. Report of Committee B-7, Appendix, 277.
Tentative Specifications for:
Magnesium-Base Alloy Die Castings, 703.
Magnesium-Base Alloy Forgings, 678.
Magnesium-Base Alloy Ingot for Remelting, 682.
Magnesium-Base Alloy Sand Castings, 684.
Magnesium-Base Alloy Sheet, 688.
Magnetic Testing.
Magnetic Properties. Report of Committee A-6, 186.
Masonry Units.
Tentative Specifications and Tests for Load-Bearing Concrete Masonry Units, 772.
Mass Color.
Tentative Methods of Test for Mass Color and Tinting Strength of Dry Color Pigments or Pastes, 871.
Mechanical Analysis.
Report on Cooperative Sub-Sieve Fineness Tests by the Working Committee on Fineness. Report of Committee C-1, 315.
Tentative Methods of Testing Molding Powders Used in Manufacturing Molded Electrical Insulators, 1001.
Melting Point.
Pyrometric Cone Equivalent *Versus* Fusion Point (A Question of Nomenclature), by F. A. Harvey. Report of Committee C-8, Appendix, 376.
Metallic Coatings.
See **Corrosion.**
Metallography.
Effect of Added Phosphorus on Low-Carbon Steel. Report of Joint Committee on Investigation of the Effect of Phosphorus and Sulfur in Steel, 113. Discussion, 122.
Effect of Sulfur on Forging Steel. Report of Joint Committee on Investigation of the Effect of Phosphorus and Sulfur in Steel, 87.
Metallography. Report of Committee E-4, 571.
The Polishing and Etching of Iron-Chromium and Iron-Chromium-Nickel Alloys, by J. R. Vilella. Report of Committee A-10, Appendix, 193.
Quality Standards for Wrought Iron. Report of Special Subcommittee of Subcommittee X on Research, Committee A-2, 129.
Service Characteristics of the Light Metals and Their Alloys. Report of Committee B-7, Appendix, 277.
Methods of Testing.
See **Testing, Physical Methods of.**
Mineral Spirits.
Tentative Specifications for Petroleum Spirits (Mineral Spirits), 876.
Miscibility-with-Water Test.
Tentative Methods of Testing Emulsified Asphalts, 926.

Modulus of Rupture.
Tentative Methods of Testing High-Temperature Heat Insulation (Compression, Flexure, Shrinkage), 791.
Molded Insulating Materials.
Electrical Insulating Materials. Report of Committee D-9, 488.
Tentative Methods of Test for:
Electrical Insulating Materials for Power Factor and Dielectric Constant, 1029.
Electrical Insulating Materials for Resistance to Impact, 995.
Molding Powders Used in Manufacturing Molded Electrical Insulators, 1001.
Sheet, Tape and Molded Insulating Materials for Dielectric Strength, 982.
Thickness of Solid Electrical Insulation, 1069.
Tentative Revision of Standard Methods of Testing Molded Materials Used for Electrical Insulation, 1277.
Molybdenum.
Tentative Method for Sampling Molybdenum Salts and Compounds for Metallurgical Use, 660.
Mortar.
Tentative Definitions of Terms Relating to Refractories, 806.
Tentative Specifications for:
Ground Fire Clay, 780.
Hydrated Lime for Structural Purposes, 752.
Quicklime for Structural Purposes, 749.
Mortar Test.
Plastic Mortar Tests for Portland Cement. Report of Working Committee, Committee C-1, 322.
Tentative Method of Test for Compressive Strength of Portland-Cement Mortars, 743.
Motor Fuel.
See **Fuel Oil; Gasoline; Petroleum Products.**
Motor Lubricants.
See **Oils; Petroleum Products.**

N

Naphtha.
Tentative Methods of Test for Color of Refined Petroleum Oil by Means of Saybolt Chromometer, 895.
Tentative Method of Test for Sulfur in Petroleum Oils by Lamp Method, 911.
Naval Stores.
Crystallization of Rosin. Report of Subcommittee II, Committee D-17, 546.
Naval Stores. Report of Committee D-17, 545.
Neutralization.
Tentative Methods of Testing Untreated Paper Used in Electrical Insulation, 1007.
Nickel.
Corrosion in Liquids. Report of Subcommittee VII, Committee B-3, 222.
Galvanic and Electrolytic Corrosion. Report of Subcommittee VIII, Committee B-3, 236.
Weight loss of metal disks in galvanic couple corrosion test after one year exposure, 242.

Nitrocellulose.
Tentative Methods of Testing Nitrocellulose Clear Lacquers and Lacquer Enamels, 879.
Nomenclature.
Magnetic Properties. Report of Committee A-6, 186.
Nomenclature and Definitions. Report of Committee E-8, 576.
Nomenclature. Report of the Technical Committee, Sectional Committee on Classification of Coals, 475.
Pyrometric Cone Equivalent *Versus* Fusion Point (A Question of Nomenclature), by F. A. Harvey. Report of Committee C-8, Appendix, 376.
Tentative Definitions of Terms:
Consistency and Plasticity, 1245.
Relating to Refractories, 806.
Relating to Textile Materials, 1186.
Tentative Revisions of Standard Definitions of:
Clay Refractories, 1264.
Terms Relating to Paint Specifications, 1271.
Terms Relating to Timber Preservatives, 1278.
Tentative Symbols for Heat Transmission, 807.

O

Octane Number.
Tentative Method of Test for Knock Characteristics of Motor Fuels, 902.
Oils.
Diesel-Fuel-Oil Classification. Report of Committee D-2, Appendix, 440.
Modified Baader Saponification Test for Electrical Insulating Oils. Report of Committee D-9, Appendix, 511.
Petroleum Products and Lubricants. Report of Committee D-2, 418.
Tentative Methods of Test for:
Color of Lubricating Oils by Means of A.S.T.M. Union Colorimeter, 885.
Color of Refined Petroleum Oil by Means of Saybolt Chromometer, 895.
Separation of Liquid Asphaltic Products, 938.
Sulfur in Petroleum Oils by Lamp Method, 911.
Tentative Specifications for Fuel Oils, 882.

P

Paints.
See also **Enamels; Lacquers; Paint Thinners; Pigments; Shellac; Varnish.**
Methods of Analysis of Paint Materials. Report of Subcommittee VIII, Committee D-1, 407.
Preservative Coatings for Structural Materials. Report of Committee D-1, 400.
Service Characteristics of the Light Metals and Their Alloys. Report of Committee B-7, Appendix, 277.
Tentative Revision of Standard Definitions of Terms Relating to Paint Specifications, 1271.
Tentative Revision of Standard Methods of Routine Analysis of White Linseed Oil Paints, 1266.
Paint Thinners.
See also **Solvents.**
Tentative Specifications for Petroleum Spirits (Mineral Spirits), 876.

Paper.
Electrical Insulating Materials. Report of Committee D-9, 488.
Tentative Methods of Testing Untreated Paper Used in Electrical Insulation, 1007.
Papers and Publications.
Annual Report of the Executive Committee, 35.
Papers and Publications. Report of Committee E-6, 573.
Summary of the Proceedings of the Thirty-seventh Annual Meeting, 1.
Symposium on the Outdoor Weathering of Metals and Metallic Coatings—Washington Regional Meeting. Report of Committee E-6 on Papers and Publications, 574.
Particle Size.
Report on Cooperative Sub-Sieve Fineness Tests by the Working Committee on Fineness. Report of Committee C-1, 315.
Partition Tile.
Tentative Specifications for Structural Clay Non-Load-Bearing Tile, 765.
Pavements.
Road and Paving Materials. Report of Committee D-4, 444.
Tentative Revisions of Standard Specifications for:
Block for Durax Granite Pavements, 1274.
Block for Granite Block Pavements, 1274.
Block for Recut Granite Block Pavements, 1274.
Tentative Specifications for Sodium Silicate for Curing Concrete, 833.
Permeability.
A Study of the Permeability of a Few Integrally Waterproofed Concretes, by W. M. Dunagan and G. C. Ernst. Report of Committee C-9, Appendix II, 383.
Petrolatum.
Tentative Method of Test for Color of Petrolatum by Means of A.S.T.M. Union Colorimeter, 890.
Petroleum Products.
Determination of flash point of viscous materials and suspensions of solids by means of the Pensky-Martens closed tester, 420.
Diesel-Fuel-Oil Classification. Report of Committee D-2, Appendix, 440.
Distillation. Report of Subcommittee B-3, Committee D-4, 448.
Gasoline. Report of Technical Committee A, Committee D-2, 435.
Modified Baader Saponification Test for Electrical Insulating Oils. Report of Committee D-9, Appendix, 511.
Petroleum Products and Lubricants. Report of Committee D-2, 418.
Standard Coefficient of Expansion for Bituminous Products. Report of Subcommittee X, Committee D-8, 486.
Tentative Methods of Test for:
Color of Lubricating Oils by Means of A.S.T.M. Union Colorimeter, 885.
Color of Petrolatum by Means of A.S.T.M. Union Colorimeter, 890.
Color of Refined Petroleum Oil by Means of Saybolt Chromometer, 895.
Emulsified Asphalts, 926.
Gum Content of Gasoline, 899.
Knock Characteristics of Motor Fuels, 902.
Separation of Liquid Asphaltic Products, 938.
Sulfur in Petroleum Oils by Lamp Method, 911.

Tentative Revisions of Standard Methods of Test for:
Dilution of Crankcase Oils, 1272.
Distillation of Gasoline, Naphtha, Kerosine and Similar Petroleum Products, 1273.
Precipitation Number of Lubricating Oils, 1273.
Water and Sediment in Petroleum Products by Means of Centrifuge, 1273.
Tentative Specifications for:
Emulsified Asphalt (For Coarse Aggregate Plant Mixes), 916.
Emulsified Asphalt (For Retread and Coarse Aggregate Mixes), 918.
Emulsified Asphalt (Heavy Premix—Summer Grade), 920.
Emulsified Asphalt (Heavy Premix—Winter Grade), 922.
Emulsified Asphalt ((Quick-Setting) for Penetration and Surface Treatment), 924.
Fuel Oils, 882.
Petroleum Spirits (Mineral Spirits), 876.

Phosphorus.
Effect of Added Phosphorus on Low-Carbon Steel. Report of Joint Committee on Investigation of the Effect of Phosphorus and Sulfur in Steel, 113. Discussion, 122.

Pigments.
See also **Paints.**
Methods of Analysis of Paint Materials. Report of Subcommittee VIII, Committee D-1, 407.
Preservative Coatings for Structural Materials. Report of Committee D-1, 400.
Specifications for Pigments Dry and in Oil when Marketed in That Form. Report of Subcommittee XV, Committee D-1, 414.
Tentative Methods of Test for Mass Color and Tinting Strength of Dry Color Pigments or Pastes, 871.
Tentative Revision of Standard Methods of Routine Analysis of Dry Red Lead, 1265.
Tentative Revision of Standard Methods of Routine Analysis of Yellow and Orange Pigments Containing Chromium Compounds, Blue Pigments and Chrome Green, 1269.
Tentative Specifications for:
High Zinc Sulfide Lithopone, 862.
Titanium Barium Pigment, 856.
Titanium Calcium Pigment, 858.
Titanium Dioxide, 860.
Zinc Sulfide, 864.

Piles.
Tentative Specifications for Timber Piles, 847.

Pipe and Piping Materials.
See also **Tubes.**
Concrete Pipe. Report of Committee C-13, 397.
Effect of Added Phosphorus on Low-Carbon Steel. Report of Joint Committee on Investigation of the Effect of Phosphorus and Sulfur in Steel, 113. Discussion, 122.
Quality Standards for Wrought Iron. Report of Special Subcommittee of Subcommittee X on Research, Committee A-2, 129.
Standardization of Dimensions and Material of Wrought-Iron and Wrought-Steel Pipe and Tubing. Report of Sectional Committee, 124.

Pipe and Piping Materials (*Continued*):
Tentative Method of Test for Long-Time (Creep) High-Temperature Tension Tests of Metallic Materials, 1223.
Tentative Method of Test for Short-Time High-Temperature Tension Tests of Metallic Materials, 1214.
Tentative Revisions of Standard Specifications for:
Carbon-Steel Castings for Valves, Flanges and Fittings for High-Temperature Service, 1256.
Forged or Rolled Steel Pipe Flanges and High-Temperature Service, 1257.
Welded and Seamless Steel Pipe, 1255.
Tentative Specifications for:
Alloy-Steel Castings for Valves, Flanges and Fittings for Service at Temperatures from 750 to 1100 F., 609.
Black and Hot-Dipped Zinc-Coated (Galvanized) Welded and Seamless Steel Pipe for Ordinary Uses, 604.
Cast-Iron Culvert Pipe, 654.
Electric-Fusion-Welded Steel Pipe for High-Temperature and High-Pressure Service, 628.
Electric-Fusion-Welded Steel Pipe (Sizes 8 in. to but not Including 30 in.), 598.
Lap-Welded and Seamless Steel Pipe for High-Temperature Service, 637.
Non-Reinforced Concrete Sewer Pipe, 809.
Reinforced-Concrete Sewer Pipe, 822.
Seamless Alloy-Steel Pipe for Service at Temperatures from 750 to 1100 F., 617.

Pitch.
Standard Coefficient of Expansion for Bituminous Products. Report of Subcommittee X, Committee D-8, 486.

Plaster.
Tentative Specifications for Hydrated Lime for Structural Purposes, 752.
Tentative Specifications for Quicklime for Structural Purposes, 749.

Plasticity.
Tentative Definitions of Terms Consistency and Plasticity, 1245.
Tentative Methods of Physical Test for Limestone, Quicklime and Hydrated Lime, 754.

Plastic Mortar Test.
Plastic Mortar Tests for Portland Cement. Report of Working Committee, Committee C-1, 322.
Tentative Method of Test for Compressive Strength of Portland-Cement Mortars, 743.

Plates.
See also **Sheets.**
Quality Standards for Wrought Iron. Report of Special Subcommittee of Subcommittee X on Research, Committee A-2, 129.
Tentative Specifications for:
Aluminum-Manganese Alloy Sheet and Plate, 673.
Aluminum Sheet and Plate, 668.
Copper-Silicon Alloy Plates and Sheets, 692.
Wrought-Iron Plates, 648.
Total Immersion Tests. Report of Subcommittee V, Committee A-5, 157.

Poles.
Tentative Specifications for Timber Piles, 847.
Portland Cement.
See **Cement.**
Pothead Compounds.
Tentative Methods of Testing Solid Filling and Treating Compounds Used for Electrical Insulation, 965.
Power Factor.
Tentative Methods of Testing Electrical Insulating Materials for Power Factor and Dielectric Constant, 1029.
Power Piping.
See **Pipe and Piping Materials.**
Presidential Address.
Annual Address by the President, Thomas R. Lawson, 27.
Protective Coatings.
See **Corrosion; Enamels; Galvanizing; Lacquers; Paints; Pigments; Shellac; Timber Preservatives; Tin; Varnish.**
Proving Levers.
Tentative Methods of Verification of Testing Machines, 1233.
Publications.

Pyrometric Cone Equivalent.
See also **Softening Point.**
Pyrometric Cone Equivalent *Versus* Fusion Point (A Question of Nomenclature), by F. A. Harvey. Report of Committee C-8, Appendix, 376.

R

Rails.
Tentative Revision of Standard Specifications for Open-Hearth Carbon-Steel Rails, 1249.
Refractories.
Pyrometric Cone Equivalent *Versus* Fusion Point (A Question of Nomenclature), by F. A. Harvey. Report of Committee C-8, Appendix, 376.
Refractories. Report of Committee C-8, 369.
Tentative Definitions of Terms Relating to Refractories, 806.
Tentative Methods of Test for:
Chemical Analysis of Magnesite Refractories, 784.
High-Temperature Heat Insulation (Compression, Flexure, Shrinkage), 791.
Panel Test for Resistance of Refractory Brick to Thermal and Structural Spalling, 796.
Panel Test for Resistance to Thermal and Structural Spalling of Fire-Clay Brick for Stationary Boilers and Malleable Iron Furnace Bungs, 804.
Tentative Revisions of Standard:
Definitions for Clay Refractories, 1264.
Method of Test for Refractory Materials Under Load at High Temperatures, 1263.
Method of Test for Softening Point of Fire-Clay Brick, 1263.
Specifications for Clay Fire Brick for Malleable Furnaces with Removable Bungs and for Annealing Ovens, 1262.
Specifications for Clay Fire Brick for Marine Boiler Service, 1262.
Specifications for Clay Fire Brick for Stationary Boiler Service, 1262.

Refractories (*Continued*):
Tentative Specifications for Ground Fire Clay, 780.
Tentative Specifications for Refractories for the Construction of Incinerators, 782.
Tentative Symbols for Heat Transmission, 807.
Reinforcement, Concrete.

Research.
Effect of Added Phosphorus on Low-Carbon Steel. Report of Joint Committee on Investigation of the Effect of Phosphorus and Sulfur in Steel, 113. Discussion, 122.
Effect of Sulfur on Forging Steel. Report of Joint Committee on Investigation of the Effect of Phosphorus and Sulfur in Steel, 87.
Effect of Temperature on the Properties of Metals. Report of Joint Research Committee, 207.
Fatigue of Metals. Report of Research Committee, 205.
Research. Report of Committee E-9, 579.
Residue.
Tentative Methods of Physical Test for Limestone, Quicklime and Hydrated Lime, 754.
Resistance Alloys.
See **Electrical Resistance and Heating Alloys.**
Resistivity.
Tentative Methods of Testing Solid Filling and Treating Compounds Used for Electrical Insulation, 965.
Rivets.
Tentative Revisions of Standard Specifications for:
Boiler Rivet Steel and Rivets, 1254.
Structural Rivet Steel, 1254.
Structural Steel for Ships, 1254.
Total Immersion Tests. Report of Subcommittee V, Committee A-5, 157.
Road Materials.
See also **Aggregates; Asphalt; Concrete; Liquid Asphaltic Road Materials; Pavements.**
(Items on road materials are also indexed under the materials and subjects covered by them.)
Road and Paving Materials. Report of Committee D-4, 444.
Rods.
Tentative Methods of Testing Laminated Round Rods Used in Electrical Insulation, 1051.
Tentative Specifications for Copper-Silicon Alloy Rods, Bars and Shapes, 695.
Rockwell Hardness.
See **Hardness Testing.**
Roofing.
Bituminous Waterproofing and Roofing Materials. Report of Committee D-8, 483.
Tentative Specifications for:
Asphalt Roofing Surfaced with Coarse Mineral Granules, 955.
Asphalt Roofing Surfaced with Fine Mineral Granules, 951.
Asphalt Roofing Surfaced with Powdered Talc or Mica, 947.
Asphalt Shingles Surfaced with Coarse Mineral Granules, 944.

Rosin.
Crystallization of Rosin. Report of Subcommittee II, Committee D-17, 546.
Naval Stores. Report of Committee D-17, 545.

Roving.
Tentative Specifications for Asbestos Roving, 1169.

Rubber Products.
Proposed Specifications for Rubber Insulating Blankets for Use Around Electrical Apparatus or Circuits Not Exceeding 3000 Volts to Ground. Report of Committee D-11, Appendix I, 522.
Rubber Products. Report of Committee D-11, 513.
Tentative Methods of Test for Abrasion Resistance of Rubber Compounds, 1150.
Tentative Method of Test for Compression Set of Vulcanized Rubber, 1164.
Tentative Specifications for:
Friction Tape for General Use for Electrical Purposes, 1139.
Insulated Wire and Cable: Class A, 30 per cent Hevea Rubber Compound, 1126.
Insulated Wire and Cable: Class AO, 30 per cent Hevea Rubber Compound, 1101.
Insulated Wire and Cable: Performance Rubber Compound, 1128.
Rubber Insulating Tape, 1145.

S

Sampling.
(Methods of sampling are indexed under the materials and subjects covered by them.)

Sand.
See also **Aggregates.**
Comparison of Standards for Colorimetric Test for Sand, Abstract of unpublished paper by C. L. Ford. Report of Committee C-9, Appendix I, 381.

Saponification Test.
Modified Baader Saponification Test for Electrical Insulating Oils. Report of Committee D-9, Appendix, 511.

Saybolt Chromometer.
Tentative Method of Test for Color of Refined Petroleum Oil by Means of Saybolt Chromometer, 895.

Scoured Content.
Tentative Method of Estimating Hard Scoured Wool in Wool in the Grease, 1184.

Sea Water Corrosion.
See **Immersion Tests.**

Settlement Test.
Tentative Methods of Testing Emulsified Asphalts, 926.

Sewer Pipe.
Concrete Pipe. Report of Committee C-13, 397.
Tentative Specifications for Non-Reinforced Concrete Sewer Pipe, 809.
Tentative Specifications for Reinforced-Concrete Sewer Pipe, 822.

Shapes.
Tentative Specifications for Copper-Silicon Alloy Rods, Bars and Shapes, 695.
Tentative Specifications for Magnesium-Base Alloy Forgings, 678.

Shear Test.
Effect of Added Phosphorus on Low-Carbon Steel. Report of Joint Committee on Investigation of the Effect of Phosphorus and Sulfur in Steel, 113. Discussion, 122.
Tentative Method of Test for Compression Set of Vulcanized Rubber, 1164.
Sheets.
See also **Plates.**
Discussion on Use of the Tension Test for Judging the Suitability of Sheet Metals for Various Purposes. Report of Committee E-1, Appendix, 563.
Field Tests of Metallic Coatings. Report of Subcommittee VIII, Committee A-5, 159.
Quality Standards for Wrought Iron. Report of Special Subcommittee of Subcommittee X on Research, Committee A-2, 129.
Tentative Methods of Test for:
Electrical Insulating Materials for Power Factor and Dielectric Constant, 1029.
Sheet and Plate Materials Used in Electrical Insulation, 1055.
Sheet, Tape and Molded Insulating Materials for Dielectric Strength, 982.
Thickness of Solid Electrical Insulation, 1069.
Tentative Specifications for:
Aluminum-Manganese Alloy Sheet and Plate, 673.
Aluminum Sheet and Plate, 668.
Cold-Rolled Strip Steel, 591.
Copper-Silicon Alloy Plates and Sheets, 692.
Magnesium-Base Alloy Sheet, 688.
Sheet Copper-Silicon Alloy, 699.
Total Immersion Tests. Report of Subcommittee V, Committee A-5, 157.
Shellac.
Shellac. Report of Subcommittee XIII, Committee D-1, 412.
Shingles.
Tentative Specifications for Asphalt Shingles Surfaced with Coarse Mineral Granules, 944.
Short-Time High-Temperature Tests.
Tentative Method of Test for Short-Time High-Temperature Tension Tests of Metallic Materials, 1214.
Shrinkage Test.
Tentative Methods of Testing High-Temperature Heat Insulation (Compression, Flexure, Shrinkage), 791.
Slag.
Tentative Revision of Standard Specifications for Broken Slag for Waterbound Base and Wearing Course, 1273.
Tentative Revision of Standard Specifications for Shovel-Run or Crusher-Run Broken Slag for Waterbound Base, 1274.
Slaking.
Tentative Specifications for Quicklime for Structural Purposes, 749.
Sludge Tests.
Electrical Insulating Materials. Report of Committee D-9, 488.
Sodium Chloride Test.
Corrosion in Liquids. Report of Subcommittee VII, Committee B-3, 222.

Sodium Hydroxide Test.
Corrosion in Liquids. Report of Subcommittee VII, Committee B-3, 222.
Sodium Silicate.
Tentative Specifications for Sodium Silicate for Curing Concrete, 833.
Softening Point.
Pyrometric Cone Equivalent *Versus* Fusion Point (A Question of Nomenclature), by F. A. Harvey. Report of Committee C-8, Appendix, 376.
Tentative Revisions of Standard:
Definitions for Clay Refractories, 1264.
Method of Test for Softening Point of Fire-Clay Brick, 1263.
Specifications for Clay Fire Brick for Malleable Furnaces with Removable Bungs and for Annealing Ovens, 1262.
Specifications for Clay Fire Brick for Marine Boiler Service, 1262.
Specifications for Clay Fire Brick for Stationary Boiler Service, 1262.
Solvents.
See also **Paint Thinners.**
Tentative Specifications for Amyl Acetate (From Fusel Oil) (85 to 88 per cent Grade), 878.
Soundness.
Volume Change and Soundness of Portland Cement. Report of Working Committee, Committee C-1, 356.
Tentative Methods of Physical Test for Limestone, Quicklime and Hydrated Lime, 754.
Spalling Test.
Tentative Method of Panel Test for Resistance of Refractory Brick to Thermal and Structural Spalling, 796.
Tentative Method of Panel Test for Resistance to Thermal and Structural Spalling of Fire-Clay Brick for Stationary Boilers and Malleable Iron Furnace Bungs, 804.
Specifications.
(Specifications are indexed under the materials and subjects covered by them.)
Stainless Steel.
See **Alloy Steel; Chromium-Nickel Alloys.**
Standardization.
Annual Address by the President, Thomas R. Lawson, 27.
Annual Report of the Executive Committee, 35.
Cement Reference Laboratory. Report of Subcommittee, Committee C-1, 361.
Quality Standards for Wrought Iron. Report of Special Subcommittee of Subcommittee X on Research, Committee A-2, 129.
Standards. Report of Committee E-10, 582.
Summary of the Proceedings of the Thirty-seventh Annual Meeting, 1.
Steel.
Corrosion of Iron and Steel. Report of Committee A-5, 154.
Discussion on Steel Reinforcement Bars for Concrete, 84.
Discussion on Use of the Tension Test for Judging the Suitability of Sheet Metals for Various Purposes. Report of Committee E-1, Appendix, 563.
Effect of Added Phosphorus on Low-Carbon Steel. Report of Joint Committee on Investigation of the Effect of Phosphorus and Sulfur in Steel, 113. Discussion, 122.

Steel (*Continued*):
Effect of Sulfur on Forging Steel. Report of Joint Committee on Investigation of the Effect of Phosphorus and Sulfur in Steel, 87.

Embrittlement Investigation. Report of Subcommittee X, Committee A-5, 184.
Fatigue of Metals. Report of Research Committee, 205.
Field Tests of Metallic Coatings. Report of Subcommittee VIII, Committee A-5, 159.
Galvanic and Electrolytic Corrosion. Report of Subcommittee VIII, Committee B-3, 236.
Iron-Chromium, Iron-Chromium-Nickel and Related Alloys. Report of Committee A-10, 190.
The Polishing and Etching of Iron-Chromium and Iron-Chromium-Nickel Alloys, by J. R. Vilella. Report of Committee A-10, Appendix, 193.
Proposed Revisions in Tentative Methods for High-Temperature Tension Tests of Metallic Materials. Report of Joint Research Committee on Effect of Temperature on the Properties of Metals, Appendix, 213.
Proposed Revisions in Standards and Tentative Standards for Steel. Report of Committee A-1, Appendix, 75.
Specifications for Metallic-Coated Products. Report of Subcommittee VI, Committee A-5, 158.
Standardization of Dimensions and Material of Wrought-Iron and Wrought-Steel Pipe and Tubing. Report of Sectional Committee, 124.
Steel. Report of Committee A-1, 60. Discussion, 84.
Symposium on the Outdoor Weathering of Metals and Metallic Coatings—Washington Regional Meeting. Report of Committee E-6 on Papers and Publications, 574.
Tentative Methods of Test for:
Impact Testing of Metallic Materials, 1201.
Long-Time (Creep) High-Temperature Tension Tests of Metallic Materials, 1223.
Short-Time High-Temperature Tension Tests of Metallic Materials, 1214.
Tentative Revisions of Standard Specifications for:
Alloy-Steel Bolting Material for High-Temperature Service, 1257.
Billet-Steel Concrete Reinforcement Bars, 1255.
Boiler Rivet Steel and Rivets, 1254.
Carbon-Steel Car and Tender Axles, 1250.
Carbon-Steel Castings for Valves, Flanges and Fittings for High-Temperature Service, 1256.
Forged or Rolled Steel Pipe Flanges for High-Temperature Service, 1257.
Open-Hearth Carbon-Steel Rails, 1249.
Quenched-and-Tempered Alloy-Steel Axles, Shafts and Other Forgings for Locomotives and Cars, 1252.
Quenched-and-Tempered Carbon-Steel Axles, Shafts and Other Forgings for Locomotives and Cars, 1251.
Rail-Steel Concrete Reinforcement Bars, 1255.
Structural Rivet Steel, 1254.
Structural Steel for Ships, 1254.
Welded and Seamless Steel Pipe, 1255.
Wrought Solid Carbon-Steel Wheels for Electric Railway Service, 1252.

Tentative Specifications for:
Alloy-Steel Castings for Valves, Flanges and Fittings for Service at Temperatures from 750 to 1100 F., 609.
Black and Hot-Dipped Zinc-Coated (Galvanized) Welded and Seamless Steel Pipe for Ordinary Uses, 604.
Cold-Rolled Strip Steel, 591.
Electric-Fusion-Welded Steel Pipe for High-Temperature and High-Pressure Service, 628.
Electric-Fusion-Welded Steel Pipe (Sizes 8 in. to but not Including 30 in.), 598.
Lap-Welded and Seamless Steel Pipe for High-Temperature Service, 637.
Seamless Alloy-Steel Pipe for Service at Temperatures from 750 to 1100 F., 617.
Total Immersion Tests. Report of Subcommittee V, Committee A-5, 157.
Weight loss of metal disks in galvanic couple corrosion test after one year exposure, 242.

Stone.
See **Aggregates.**

Strand Wire.
Wire Test Program. Report of Subcommittee VIII, Committee A-5, Appendix, 172.

Strip Steel.
Tentative Specifications for Cold-Rolled Strip Steel, 591.

Structural Alloys.
Tentative Specifications for Copper-Silicon Alloy Rods, Bars and Shapes, 695.
Tentative Specifications for Magnesium-Base Alloy Forgings, 678.

Structural Characteristics.
Effect of Added Phosphorus on Low-Carbon Steel. Report of Joint Committee on Investigation of the Effect of Phosphorus and Sulfur in Steel, 113. Discussion, 122.
Effect of Sulfur on Forging Steel. Report of Joint Committee on Investigation of the Effect of Phosphorus and Sulfur in Steel, 87.
Quality Standards for Wrought Iron. Report of Special Subcommittee of Subcommittee X on Research, Committee A-2, 129.
Service Characteristics of the Light Metals and Their Alloys. Report of Committee B-7, Appendix, 277.

Structural Clay Tile.
See **Tile.**

Sulfate Resisting Cement.
Cement. Report of Committee C-1, 307.

Sulfur.
Effect of Sulfur on Forging Steel. Report of Joint Committee on Investigation of the Effect of Phosphorus and Sulfur in Steel, 87.
Tentative Method of Test for Sulfur in Petroleum Oils by Lamp Method, 911.

Sulfuric Acid Test.
Corrosion in Liquids. Report of Subcommittee VII, Committee B-3, 222.

Summary of Proceedings.
Summary of the Proceedings of the Thirty-seventh Annual Meeting, 1.

T

Tape.
Tentative Methods of Test for:
Sheet, Tape and Molded Insulating Materials for Dielectric Strength, 982.
Thickness of Solid Electrical Insulation, 1069.
Varnished Cloths and Varnished Cloth Tapes Used in Electrical Insulation, 1074.
Tentative Specifications for:
Black Bias-Cut Varnished Cloth Tape Used for Electrical Insulation, 959.
Friction Tape for General Use for Electrical Purposes, 1139.
Insulated Wire and Cable: Class AO, 30 per cent Hevea Rubber Compound, 1101.
Rubber Insulating Tape, 1145.

Tar.
Standard Coefficient of Expansion for Bituminous Products. Report of Subcommittee X, Committee D-8, 486.

Tear Test.
Tentative Methods of Testing Untreated Paper Used in Electrical Insulation, 1007.
Tentative Revision of Standard General Methods of Testing Woven Textile Fabrics, 1276.
Tentative Revision of Standard Specifications for Tolerances and Test Methods for Certain Light and Medium Cotton Fabrics, 1275.

Temperature, Effect of.
See also **Heat Treatment; High Temperature.**
Effect of Temperature on the Properties of Metals. Report of Joint Research Committee, 207.
Proposed Revisions in Tentative Methods for High-Temperature Tension Tests of Metallic Materials. Report of Joint Research Committee on Effect of Temperature on the Properties of Metals, Appendix, 213.
Tentative Methods of Test for:
Linear Expansion of Metals, 733.
Long-Time (Creep) High-Temperature Tension Tests of Metallic Materials, 1223.
Short-Time High-Temperature Tension Tests of Metallic Materials, 1214.
Tentative Symbols for Heat Transmission, 807.

Tension Testing.
Discussion on Use of the Tension Test for Judging the Suitability of Sheet Metals for Various Purposes. Report of Committee E-1, Appendix, 563.
Effect of Added Phosphorus on Low-Carbon Steel. Report of Joint Committee on Investigation of the Effect of Phosphorus and Sulfur in Steel, 113. Discussion, 122.
Effect of Sulfur on Forging Steel. Report of Joint Committee on Investigation of the Effect of Phosphorus and Sulfur in Steel, 87.
The Effect of Variations in Aluminum Content on the Strength and Permanence of the A.S.T.M. No. XXIII Zinc Die-Casting Alloy, by E. A. Anderson and G. L. Werley. Report of Committee B-6, Appendix, 261. Discussion, 270.
Proposed Revisions in Tentative Methods for High-Temperature Tension Tests of Metallic Materials. Report of Joint Research Committee on Effect of Temperature on the Properties of Metals, Appendix, 213.

Plastic Mortar Tests for Portland Cement. Report of Working Committee, Committee C-1, 322.
Tentative Methods of Test for:
Laminated Round Rods Used in Electrical Insulation, 1051.
Laminated Tubes Used in Electrical Insulation, 1064.
Long-Time (Creep) High-Temperature Tension Tests of Metallic Materials, 1223.
Sheet and Plate Materials Used in Electrical Insulation, 1055.
Short-Time High-Temperature Tension Tests of Metallic Materials, 1214.
Untreated Paper Used in Electrical Insulation, 1007.
Varnished Cloths and Varnished Cloth Tapes Used in Electrical Insulation, 1074.
Verification of Testing Machines, 1233.
Tentative Specifications for Insulated Wire and Cable: Class AO, 30 per cent Hevea Rubber Compound, 1101.
Tentative Specifications for Insulated Wire and Cable: Performance Rubber Compound, 1128.
Test Bars. Report of Special Subcommittee, Committee A-3, 148.

Test Bars.
Test Bars. Report of Special Subcommittee, Committee A-3, 148.

Testing Apparatus.
See also **Testing, Physical Methods of.**
Tentative Methods of Test for:
Impact Testing of Metallic Materials, 1201.
Knock Characteristics of Motor Fuels, 902.
Verification of Testing Machines, 1233.

Testing, Physical Methods of.
(Methods of analysis, sampling, testing, etc., and revisions thereof, are also indexed under the materials and subjects covered by them.)
Discussion on Use of the Tension Test for Judging the Suitability of Sheet Metals for Various Purposes. Report of Committee E-1, Appendix, 563.
Methods of Testing. Report of Committee E-1, 553.
Tentative Methods of Test for:
Impact Testing of Metallic Materials, 1201.
Linear Expansion of Metals, 733.
Long-Time (Creep) High-Temperature Tension Tests of Metallic Materials, 1223.
Short-Time High-Temperature Tension Tests of Metallic Materials, 1214.

Textile Materials.
Tentative Definitions and Terms Relating to Textile Materials, 1186.
Tentative Methods of Test for:
Estimating Hard Scoured Wool in Wool in the Grease, 1184.
Thickness of Solid Electrical Insulation, 1069.
Varnished Cloths and Varnished Cloth Tapes Used in Electrical Insulation, 1074.
Tentative Revisions of Standard:
General Methods of Testing Woven Textile Fabrics, 1276.
Specifications for Chafer Tire Fabrics, 1275.
Specifications for Tolerances and Test Methods for Certain Light and Medium Cotton Fabrics, 1275.

Textile Materials (*Continued*):
Tentative Specifications for:
Asbestos Roving, 1169.
Asbestos Yarns, 1172.
Black Bias-Cut Varnished Cloth Tape Used for Electrical Insulation, 959.
Holland Cloth, 1175.
Tolerances and Test Methods for Woolen Yarns, 1178,
Tolerances and Test Methods for Worsted Yarns, 1181.
Textile Materials. Report of Committee D-13, 532.
Thawing Tests.
See **Freezing-and-Thawing Tests.**
Thermometers.
High-distillation thermometer, spec. for, 940.
Thermometers and Laboratory Glassware. Report of Committee D-15, 543.
Thermostatic Metals.
Electrical-Heating, Electrical-Resistance and Electric-Furnace Alloys. Report of Committee B-4, 244.
Thickness.
Tentative Methods of Test for Thickness of Solid Electrical Insulation, 1069.
Thinners, Paint.
See **Paint Thinners; Solvents.**
Tile.
Hollow Masonry Building Units. Report of Committee C-10, 393.
Tentative Methods of Sampling and Testing Structural Clay Tile, 776.
Tentative Specifications for:
Structural Clay Floor Tile, 761.
Structural Clay Load-Bearing Wall Tile, 768.
Structural Clay Non-Load-Bearing Tile, 765.
Timber.
Tentative Specifications for Timber Piles, 847.
Timber. Report of Committee D-7, 481.
Timber Preservatives.
Tentative Revision of Standard Definitions of Terms Relating to Timber Preservatives, 1278.
Tentative Specifications for Creosote, 843.
Tentative Specifications for Creosote Coal-Tar Solution, 845.
Timber. Report of Committee D-7, 481.
Tin.
Galvanic and Electrolytic Corrosion. Report of Subcommittee VIII, Committee B-3, 236.
Weight loss of metal disks in galvanic couple corrosion test after one year exposure, 242.
Tinting Strength.
Tentative Method of Test for Tinting Strength of White Pigments or White Pigment Pastes, 866.
Tentative Methods of Test for Mass Color and Tinting Strength of Dry Color Pigments or Pastes, 871.
Tire Cord and Fabrics.
Tentative Revision of Standard Specifications for Chafer Tire Fabrics, 1275.
Tentative Specifications for Holland Cloth, 1175.

Titanium Pigments.
Tentative Method of Test for Tinting Strength of White Pigments or White Pigment Pastes, 866.
Tentative Specifications for Titanium Calcium Pigment, 858.
Tentative Specifications for Titanium Dioxide, 860.
Torsion.
Effect of Sulfur on Forging Steel. Report of Joint Committee on Investigation of the Effect of Phosphorus and Sulfur in Steel, 87.
Toughness.
Tentative Methods of Impact Testing of Metallic Materials, 1201.
Tentative Methods of Testing Electrical Insulating Materials for Resistance to Impact, 995.
Transformer Oils.
Electrical Insulating Materials. Report of Committee D-9, 488.
Modified Baader Saponification Test for Electrical Insulating Oils. Report of Committee D-9, Appendix, 511.
Transverse Testing.
See **Flexure Testing.**
Tubes.
See also **Pipe and Piping Materials.**
Standardization of Dimensions and Material of Wrought-Iron and Wrought-Steel Pipe and Tubing. Report of Sectional Committee, 124.
Tentative Methods of Test for:
Electrical Insulating Materials for Power Factor and Dielectric Constant, 1029.
Laminated Tubes Used in Electrical Insulation, 1064.
Long-Time (Creep) High-Temperature Tension Tests of Metallic Materials, 1223.
Short-Time High-Temperature Tension Tests of Metallic Materials, 1214.
Total Immersion Tests. Report of Subcommittee V, Committee A-5, 157.
Turbidimeter.
Report on Cooperative Sub-Sieve Fineness Tests by the Working Committee on Fineness. Report of Committee C-1, 315.

U

Union Colorimeter.
Tentative Method of Test for Color of Lubricating Oils by Means of A.S.T.M. Union Colorimeter, 885.
Tentative Method of Test for Color of Petrolatum by Means of A.S.T.M. Union Colorimeter, 890.

V

Valves.
Tentative Revisions of Standard Specifications for:
Composition Brass or Ounce Metal Sand Castings, 1259.
Sand Castings of the Alloy: Copper 88 per cent; Tin 8 per cent; Zinc 4 per cent, 1260.
Steam or Valve Bronze Sand Castings, 1259.
Tentative Specifications for Alloy-Steel Castings for Valves, Flanges and Fittings for Service at Temperatures from 750 to 1100 F., 609.

Varnish.
Description and use of remodeled MacMichael viscosimeter for determining viscosity of insulating varnishes, 1092.
Electrical Insulating Materials. Report of Committee D-9, 488.
Preservative Coatings for Structural Materials. Report of Committee D-1, 400.
Tentative Methods of Testing Varnished Cloths and Varnished Cloth Tapes Used in Electrical Insulation, 1074.
Tentative Methods of Testing Varnishes Used for Electrical Insulation, 1082.
Tentative Specifications for Black Bias-Cut Varnished Cloth Tape Used for Electrical Insulation, 959.

Viscosity.
See also **Consistency.**
Description and use of remodeled MacMichael viscosimeter for determining viscosity of insulating varnishes, 1092.
Tentative Methods of Test for:
Emulsified Asphalts, 926.
Nitrocellulose Clear Lacquers and Lacquer Enamels, 879.
Varnishes Used for Electrical Insulation, 1082.

Volume Change.
Volume Change and Soundness of Portland Cement. Report of Working Committee, Committee C-1, 356.
Tentative Methods of Testing High-Temperature Heat Insulation (Compression, Flexure, Shrinkage), 791.
Tentative Methods of Testing Solid Filling and Treating Compounds Used for Electrical Insulation, 965.

W

Water.
See also **Absorption.**
Tentative Methods of Testing Emulsified Asphalts, 926.
Water for Industrial Uses. Report of Committee D-19, 551.

Waterproofing.
Bituminous Waterproofing and Roofing Materials. Report of Committee D-8, 483.
Standard Coefficient of Expansion for Bituminous Products. Report of Subcommittee X, Committee D-8, 486.
A Study of the Permeability of a Few Integrally Waterproofed Concretes, by W. M. Dunagan and G. C. Ernst. Report of Committee C-9, Appendix II, 383.
Tentative Methods of Testing Emulsified Asphalts, 926.

Water-tightness.
See **Permeability.**

Weathering Tests.
Preservative Coatings for Structural Materials. Report of Committee D-1, 400.
Symposium on the Outdoor Weathering of Metals and Metallic Coatings—Washington Regional Meeting. Report of Committee E-6 on Papers and Publications, 574.

Weight.
Tentative Methods of Sampling and Testing Structural Clay Tile, 776.

Welding.
Service Characteristics of the Light Metals and Their Alloys. Report of Committee B-7, Appendix, 277.
Tentative Specifications for Electric-Fusion-Welded Steel Pipe for High-Temperature and High-Pressure Service, 628.
Tentative Specifications for Electric-Fusion-Welded Steel Pipe (Sizes 8 in. to but not Including 30 in.), 598.

Wheels.
Tentative Revision of Standard Specifications for Wrought Solid Carbon-Steel Wheels for Electric Railway Service, 1252.

Wire.
Electrical-Heating, Electrical-Resistance and Electric-Furnace Alloys. Report of Committee B-4, 244.
Field Tests of Metallic Coatings. Report of Subcommittee VIII, Committee A-5, 159.
Quality Standards for Wrought Iron. Report of Special Subcommittee of Subcommittee X on Research, Committee A-2, 129.
Specifications for Metallic-Coated Products. Report of Subcommittee VI, Committee A-5, 158.
Tentative Methods of Chemical Analysis of Metallic Materials for Electrical Heating, 710.
Tentative Specifications for:
Insulated Wire and Cable: Class A, 30 per cent Hevea Rubber Compound, 1126.
Insulated Wire and Cable: Class AO, 30 per cent Hevea Rubber Compound, 1101.
Insulated Wire and Cable: Performance Rubber Compound, 1128.
Wire Test Program. Report of Subcommittee VIII, Committee A-5, Appendix, 172.

Wood.
See **Timber.**

Wool.
Tentative Method of Estimating Hard Scoured Wool in Wool in the Grease, 1184.
Tentative Specifications for Tolerances and Test Methods for Woolen Yarns, 1178.
Tentative Specifications for Tolerances and Test Methods for Worsted Yarns, 1181.
Textile Materials. Report of Committee D-13, 532.

Wrought Iron.
Quality Standards for Wrought Iron. Report of Special Subcommittee of Subcommittee X on Research, Committee A-2, 129.
Standardization of Dimensions and Material of Wrought-Iron and Wrought-Steel Pipe and Tubing. Report of Sectional Committee, 124.
Tentative Methods of Impact Testing of Metallic Materials, 1201.
Tentative Revision of Standard Specifications for Hollow Rolled Staybolt Iron, 1258.
Tentative Specifications for Wrought-Iron Plates, 648.
Wrought Iron. Report of Committee A-2, 126.

Y

Yarns.
Tentative Specifications for:
Asbestos Yarns, 1172.
Tolerances and Test Methods for Woolen Yarns, 1178.
Tolerances and Test Methods for Worsted Yarns, 1181.

Z

Zinc.

Report of Committee C-10 on Hollow Masonry Building Units, 393.
Ernst, G. C.
A Study of the Permeability of a Few Integrally Waterproofed Concretes. Appendix II, Report of Committee C-9, 383.

F

Faragher, P. V.
Report of Committee B-6 on Die-Cast Metals and Alloys, 251.
Farnsworth, F. F.
Report of Subcommittee VI, Committee A-5, on Specifications for Metallic-Coated Products, 158.
Faus, H. W.
Report of Committee A-2 on Wrought Iron, 126.
Fieldner, A. C.
Report of Committee D-5 on Coal and Coke, 451.
Report of Sectional Committee on Classification of Coals, 463.
Ford, C. L.
Comparison of Standards for Colorimetric Test for Sand (Abstract of Unpublished Paper). Appendix I, Report of Committee C-9, 381.

French, H. J.
Report of Joint Research Committee on Effect of Temperature on the Properties of Metals, 207.
Fuller, T. S.
Report of Committee B-3 on Corrosion of Non-Ferrous Metals and Alloys, 221.
Fulweiler, W. H.
Report of Committee D-15 on Thermometers and Laboratory Glassware, 543.
Report of Committee E-1 on Methods of Testing, 553.
Report of Subcommittee B-3, Committee D-4, on Distillation, 448.

G

Gann, J. A.
Report of Committee B-7 on Light Metals and Alloys, Cast and Wrought, 272.
Gilkey, H. J.
Discussion, 84.
Gill, J. B.
Report of Committee A-9 on Ferro-Alloys, 188.
Ginder, J. W.
Report of Committee C-11 on Gypsum, 395.
Gonnerman, H. F.
Report of Working Committee, Committee C-1, on Volume Change and Soundness of Portland Cement, 356.

H

Harder, O. E.
Report of Committee E-4 on Metallography, 571.
Harvey, Dean.
Report of Committee B-4 on Electrical-Heating, Electrical-Resistance and Electric-Furnace Alloys, 244.
Harvey, F. A.
Pyrometric Cone Equivalent *Versus* Fusion Point (A Question of Nomenclature), Appendix, Report of Committee C-8, 376.
Hecht, Max.
Report of Committee D-19 on Water for Industrial Uses, 551.
Heindl, R. A.
Report of Committee C-8 on Refractories, 369.
Hess, R. E.
Report of Committee E-1 on Methods of Testing, 553.
Report of Committee E-8 on Nomenclature and Definitions, 576.
Higgins, J. H.
Quality Standards for Wrought Iron. Report of Special Subcommittee of Subcommittee X, Committee A-2, 129.
Hippensteel, C. L.
Report of Subcommittee VIII, Committee B-3, on Galvanic and Electrolytic Corrosion, 236.
Holbrook, E. A.
Report of the Technical Committee on Nomenclature, Sectional Committee on Classification of Coals, 475.
Horning, H. L.
Report of Technical Committee A, Committee D-2, on Gasoline, 435.

Hubbard, Prévost.
Report of Committee D-4 on Road and Paving Materials, 444.
Report of Committee D-8 on Bituminous Waterproofing and Roofing Materials, 483.
Huntress, C. B.
Report of Sectional Committee on Classification of Coals, 463.

I

Ince, C. R.
Discussion, 271.

J

Johnson, J. B.
Report of Committee B-7 on Light Metals and Alloys, Cast and Wrought, 272.

K

Kelley, W. G.
Report of Subcommittee X, Committee A-5, on Embrittlement Investigation, 184.
Kenyon, R. L.
Discussion on Use on the Tension Test for Judging the Suitability of Sheet Metals for Various Purposes. Appendix, Report of Committee E-1, 563.

L

Lawson, Thomas R.
Annual Address by the President, 27.
Annual Report of the Executive Committee, 35.
Litehiser, R. R.
Report of Committee C-9 on Concrete and Concrete Aggregates, 378.
Loving, M. W.
Report of Committee C-13 on Concrete Pipe, 397.
Lundell, G. E. F.
Quality Standards for Wrought Iron. Report of Special Subcommittee of Subcommittee X, Committee A-2, 129.

M

MacPherran, R. S.
Report of Special Subcommittee, Committee A-3, on Test Bars, 148.
Mathewson, C. H.
Report of Committee B-5 on Copper and Copper Alloys, Cast and Wrought, 249.
McKay, R. J.
Report of Subcommittee VII, Committee B-3, on Corrosion in Liquids, 222.
McKnight, Charles.
Report of Committee A-9 on Ferro-Alloys, 188.
Miller, J. S., Jr.
Report of Subcommittee X, Committee D-8, on Standard Coefficient of Expansion for Bituminous Products, 486.
Mochel, N. L.
Report of Joint Research Committee on Effect of Temperature on the Properties of Metals, 207.

Moore, H. F.
Report of Committee E-9 on Research, 579.
Report of Research Committee on Fatigue of Metals, 205.
Moore, O. L.
Report of Working Committee, Committee C-1, on Plastic Mortar Tests for Portland Cement, 322.
Morgan, H. H.
Report of Committee A-1 on Steel, 60.
Report of Sectional Committee on Standardization of Dimensions and Material of Wrought-Iron and Wrought-Steel Pipe and Tubing, 124.

N

Newell, H. D.
Report of Committee A-10 on Iron-Chromium, Iron-Chromium-Nickel and Related Alloys, 190.
Newlin, J. A.
Report of Committee D-7 on Timber, 481.

O

Olcott, F. B.
Quality Standards for Wrought Iron. Report of Special Subcommittee of Subcommittee X, Committee A-2, 129.
Report of Subcommittee V, Committee A-5, on Total Immersion Tests, 157.

P

Paisley, J. W.
Report of Subcommittee XIII, Committee D-1, on Shellac, 412.
Parsons, D. E.
Report of Committee C-10 on Hollow Masonry Building Units, 393.
Passano, R. F.
Report of Subcommittee VIII, Committee A-5, on Field Tests of Metallic Coatings, 159.
Paul, M. Rea.
Report of Committee D-1 on Preservative Coatings for Structural Materials, 400.
Pearson, J. C.
Report on Cooperative Sub-Sieve Fineness Tests by the Working Committee, Committee C-1, on Fineness, 315.
Peirce, W. M.
Report of Subcommittee V, Committee B-6, on Exposure and Corrosion Tests, 255.
Phillips, A. E.
Report of Committee C-13 on Concrete Pipe, 397.
Porter, H. C.
Report of Committee D-5 on Coal and Coke, 451.

R

Rawdon, H. S.
Effect of Added Phosphorus on Low-Carbon Steel: Report of the Joint Committee on Investigation of the Effect of Phosphorus and Sulfur in Steel, 113.
Effect of Sulfur on Forging Steel. Report of the Joint Committee on Investigation of the Effect of Phosphorus and Sulfur in Steel, 87.
Discussion, 122.

Reeve, C. S.
Report of Committee D-15 on Thermometers and Laboratory Glassware, 543.
Ressler, C. T.
Quality Standards for Wrought Iron. Report of Special Subcommittee of Subcommittee X, Committee A-2, 129.
Rogers, Allen.
Report of Committee D-1 on Preservative Coatings for Structural Materials, 400.
Romaine, E. V.
Report of Subcommittee II, Committee D-17, on Crystallization, 546.
Rose, H. J.
Report of the Technical Committee on Coal Classification, Sectional Committee on Classification of Coals, 478.
Report of the Technical Committee on Scientific Classification, Sectional Committee on Classification of Coals, 469.
Rother, W. H.
Report of Committee A-3 on Cast Iron, 145.

S

Saeger, G. A.
Report of Committee C-1 on Cement, 307.
Schlossberg, J. B.
Quality Standards for Wrought Iron. Report of Special Subcommittee of Subcommittee X, Committee A-2, 129.
Schweim, H. J.
Report of Committee C-11 on Gypsum, 395.
Scott, J. A.
Report of Committee D-9 on Electrical Insulating Materials, 488.
Selvig, W. A.
Report of Committee D-5 on Coal and Coke, 451.
Report of the Technical Committee on Coal Classification, Sectional Committee on Classification of Coals, 478.
Report of the Technical Committee on Scientific Classification, Sectional Committee on Classification of Coals, 469.
Shelley, H. T.
Report of Committee C-3 on Brick, 364.
Smith, H. E.
Report of Committee A-5 on Corrosion of Iron and Steel, 154.
Report of Subcommittee XV, Committee D-1, on Specifications for Pigments Dry and in Oil when Marketed in That Form, 414.
Sanford, R. L.
Report of Committee A-6 on Magnetic Properties, 186.
Spooner, Thomas.
Report of Committee A-6 on Magnetic Properties, 186.
Story, E. B.
Quality Standards for Wrought Iron. Report of Special Subcommittee of Subcommittee X, Committee A-2, 129.
Strauss, Jerome.
Report of Committee A-10 on Iron-Chromium, Iron-Chromium-Nickel and Related Alloys, 190.

Stutz, G. F. A.
Report of Subcommittee VIII, Committee D-1, on Methods of Analysis of Paint Materials, 407.

T

Thum, E. E.
Report of Committee B-2 on Non-Ferrous Metals and Alloys, 217.
Tour, Sam.
Report of Committee B-3 on Corrosion of Non-Ferrous Metals and Alloys, 221. Discussion, 270.
Townsend, J. R.
Discussion on Use of the Tension Test for Judging the Suitability of Sheet Metals for Various Purposes. Appendix, Report of Committee E-1, 566.
Trainor, Lee S.
Report of C-7 on Lime, 366.

V

Veal, C. B.
Report of Technical Committee A, Committee D-2, on Gasoline, 435.
Veitch, F. P.
Report of Committee D-17 on Naval Stores, 545.
Vilella, J. R.
The Polishing and Etching of Iron-Chromium and Iron-Chromium-Nickel Alloys. Appendix, Report of Committee A-10, 193.
von Schrenk, Hermann.
Report of Committee D-7 on Timber, 481.

W

Warwick, C. L.
Annual Report of the Executive Committee, 35.
Effect of Added Phosphorus on Low-Carbon Steel. Report of the Joint Committee on Investigation of the Effect of Phosphorus and Sulfur in Steel, 113.
Effect of Sulfur on Forging Steel. Report of the Joint Committee on Investigation of the Effect of Phosphorus and Sulfur in Steel, 87.
Report of Committee E-6 on Papers and Publications, 573.
Report of Committee E-9 on Research, 579.
Report of Committee E-10 on Standards, 582.
Weiss, J. M.
Report of Committee D-8 on Bituminous Waterproofing and Roofing Materials, 483.
Werley, G. L.
The Effect of Variations in Aluminum Content on the Strength and Permanence of the A.S.T.M. No. XXIII Zinc Die-Casting Alloy. Appendix, Report of Committee B-6, 261.
Whitcomb, W. H.
Report of Committee D-13 on Textile Materials, 532.
Whittemore, J. W.
Report of Committee C-3 on Brick, 364.
Withrow, James R.
Report of Committee C-7 on Lime, 366.
Woodroffe, G. H.
Report of Committee A-2 on Wrought Iron, 126.
